

## Feedback for RRMP Research Proposal Summative

Tutor completing summative feedback: Karen Outram:	Student number: 428470
Details of any extensions etc: 75%	Submission Attempt: First submission Second submission

Criteria and weighting	Level	Comments:
<b>Knowledge and Understanding weighted 25%,</b> Are the major points identified? Are the details presented clearly?	<b>Outstanding</b>	Outstanding knowledge of the subject demonstrated, with a very thorough application of research and personal understanding of how the research and assignment will be pulled together. Take this approach forward for your Capstone project when this occurs.
<b>Criticality weighted at 25%,</b> Is there a critical discussion/analysis of your methodology/design?	<b>Excellent</b>	From an academically structured perspective, there is excellent critical concepts regarding how the project will be executed from a theoretical perspective and also what it hopes to achieve. Regarding your next module – if you choose to take this project forward, use your research to gain appropriate critical depth of the strengths and limitations of the research you choose to discuss.
<b>Structure and Presentation weighted at 10%:</b> Is the presentation well organised?	<b>Very Good</b>	The presentation is well organised and logical. What I would say moving forward is to try and break the slides up with some visual input where you can. And so some info-graphic content can be really useful for this purpose for example.
<b>Presentation and Communication Skills weighted at 30%:</b> Is the presentation clearly introduced and concluded? Is the presentation well-paced and timed? Is the information presented clearly and concisely? Is the presentation style lively, fluent and engaging?	<b>Excellent</b>	Excellent well-paced presentation and communication style. Referring to the above, if you added visual imagery, it would also likely allow you to break the pace of your presentation up somewhat and add that little bit of extra interest to the content. Other than that, the presentation was thorough and the subject matter interesting.

<b>Use of relevant sources weighted at 5%:</b> Are the major points identified? Are the details presented clearly?	<b>Outstanding</b>	Outstanding and thorough discussion around all the key points identified for the research. The presentation was clear and focused
<b>Use of relevant sources weighted at 5%:</b> Is there a critical discussion/analysis of your methodology/design?	<b>Excellent</b>	Excellent academic critical approach to the discussion. As already highlighted, take the concept and look at the pros and cons of any research should you take this forward to the Capstone project for example.
Overall		
<b>Positives:</b> <ul style="list-style-type: none"> <li>• A well planned well executed presentation</li> <li>• With mostly excellent, and some outstanding and very good outcomes</li> <li>• With an excellent outcome overall</li> </ul>		
<b>Points for development:</b> <ul style="list-style-type: none"> <li>• You could you develop your critical discussion a little more around strengths and limitations of research</li> <li>• Should you take this subject forward to the Capstone project then do take this into account</li> <li>• Otherwise continue to take your current approach forward into future modules</li> </ul>
